

LM1 Intelligent Automation

Loan operations is a complex domain that requires intelligence to navigate, particularly with respect to loan processing and underwriting based on information, rules, and the goals of the bank and regulators. To perform this efficiently and effectively, the LSPS engine combines dynamic execution, event management, task multi-threading, collaboration, and machine intelligence. LSPS powers LM1 to digitally transform the work of lending teams.

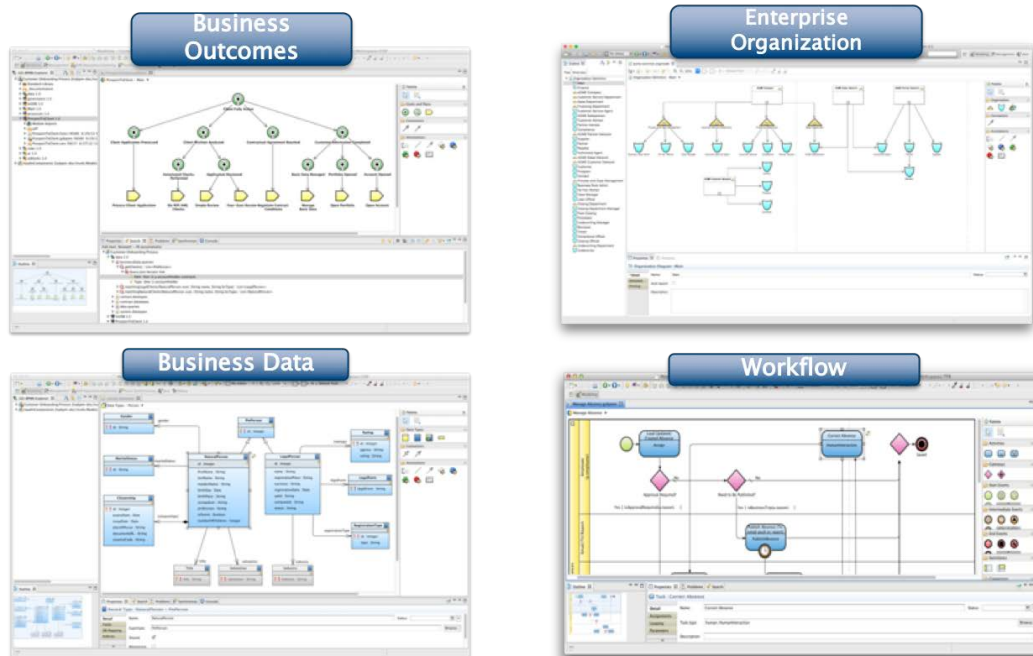

- ❖ Unique abilities
- ❖ Future-proof design
- ❖ Ability to expand capabilities
- ❖ Ability to field new solutions

The Whitestein LSPS is used within over 600 financial institutions to automate processes such as customer on-boarding, compliance monitoring, account creation, and more.

- ❖ LSPS is considered an Intelligent Business Process Management Suite, Whitestein is an industry recognized leader in this area.
- ❖ LM1 clients have the option to use the power of LSPS to customize and extend the LM1 solution to power specialized innovations
- ❖ LM1 clients have the option to automate any process or operation with LSPS

LoanManagement

LM1 is powered by Whitestein's Living Systems Process Suite (LSPS). LSPS is an industry leading iBPMS that combines goals, decisions, people, process, and data to build simple yet powerful applications that meet any business requirement.

- Application Intelligence
 - Unique Goal-Oriented Technology for modeling and executing
 - Goals align application behavior with desired business outcomes
- Autonomic System Steering
 - Use of goals to intelligently decide when to adapt application behavior
 - Goals allow dynamic reordering and concurrency of behavior
- End-user Steering
 - Application auto-introspection allows end-user to alter behavior
 - Decision Modeling Notation
- Strategic Decision Support
 - Manage strategic coordination of decisions and software ecosystems
- Predictive Analytics
 - Active assessment of the now to predict potential future behavior
